Assignment 1 – two tasks

This shows the terminal working for both tasks

In the code I added these two functions

And I added the tasks with the handler

```
printf("Creating Tasks...\n");
//xTaskHandle HT;
//xTaskCreate(HelloTask, "HelloTask", configMINIMAL_STACK_SIZE, NULL, 1, &HT);

xTaskHandle Task1Handle;
xTaskHandle Task2Handle;
xTaskCreate(Task1, "Task1", 1000, NULL, 3, &Task1Handle);
xTaskCreate(Task2, "Task2", 100, NULL, 1, &Task2Handle);
```
